

Quang Phu Nguyen

quangphunguyen1804@gmail.com | [linkedin.com/in/quangphunguyen](https://www.linkedin.com/in/quangphunguyen) | github.com/pdz1804

Vietnamese – Native | English – Professional Working Proficiency (IELTS 6.5)

Professional Summary

AI Engineer with 2 years of experience shipping production **LLM, RAG and Agentic AI** systems end to end — agent design, FastAPI backends, and cloud deployment on **AWS & Azure**.

Delivered a **healthcare agentic chatbot** at **>90% end-to-end accuracy**, an **automated agent evaluation** system (LLM-as-a-Judge + rule validation), and **MCP-based enterprise integrations** with secure, permission-aware access. Graduated **Excellent, GPA 3.8/4.0**.

Education

Ho Chi Minh City University of Technology (HCMUT)

Bachelor of Computer Science (Major in Applied Artificial Intelligence)

Ho Chi Minh City, Vietnam

Sep 2022 – 2026

- **Graduated with Excellent** classification — **Cumulative GPA: 3.8/4.0**
- **Academic Incentive Scholarship** (4/8 semesters), **OISP Scholarship** (3/8 semesters), **Consolidation Prize** — Bach Khoa Innovation Contest (Jun 2023).

Le Hong Phong High School For The Gifted

Mathematics Honors Class

Ho Chi Minh City, Vietnam

2019 - 2022

WORK EXPERIENCE

Associate AI Engineer

Supervisor: Dr. Nguyen Duy Khuong

Nov 2025 – Present

FPT Software AI Center, Ho Chi Minh City – F-Town 3

- **Agentic ERP Platform:** building AI agent applications on top of enterprise ERP systems (Odoo, NetSuite); implemented **centralized MCP integrations** (Google Workspace, Slack, Jira, Confluence, GitHub, Notion) behind one integration layer with a shared query **pushdown** mechanism.
- Owned assigned connectors end to end — per-vendor **OAuth**, credential handling, **permission-aware** calls, rate-limit and error semantics, automated tests and audit logging.
- Delivered the **Prysm Portal** — prompt, knowledge and guardrail management with change history, monitoring dashboards and audit logging — so AI behaviour is tuned by configuration instead of a release.
- Led the POC-to-production transition of a **healthcare agentic chatbot** on **AWS Bedrock AgentCore**, reaching **>90% end-to-end accuracy** while cutting latency through shared component reuse.
- Built an **automated LLM-based testing system** (rule validation, compliance checks, latency monitoring, quality gates) for the Smart Product Recommendation project, so releases are approved on measured evidence.
- Presented 3 internal **AI4ALL** knowledge-sharing sessions and mentored an intern; team received the “**Best Team**” award within FPT Americas (ST25).

AI Engineer Intern

Supervisor: Dr. Nguyen Duy Khuong

Jun 2025 – Oct 2025

FPT Software AI Center, Ho Chi Minh City – F-Town 3

Remote Supervisor: Prof. Kazuyuki Motohashi

The University of Tokyo, Japan

- Built a **Blog System with AI search & recommendation** in a four-member team on Azure AI Search, Cosmos DB (NoSQL), Redis and Azure OpenAI.
- Designed **M3ARAG**, a locally deployable, GPU-accelerated **Multi-Agent RAG** system answering questions over PDFs, HTML, Office documents and text.
- Developed a **Dual Attention Model** extracting technical keywords from company websites and a Transformation Matrix aligning Company–Patent data for the end-to-end Innovation Discovery pipeline.

Research Assistant

Supervisor: Mr. Bui Cong Tuan (PhD Candidate)

Jun 2024 – Dec 2024

Ho Chi Minh City University of Technology

- Designed an unsupervised **Knowledge Graph** construction framework requiring minimal domain-expert input, and evaluated SOTA **LLMs** for entity/intent extraction on raw Vietnamese documents.

Key Projects (delivered at work)

- Agentic ERP Platform** | *MCP, OAuth 2.0, FastAPI, PostgreSQL* Jun 2026 – Present
- Agents layered over ERP systems (Odoo, NetSuite) with centralized MCP connectors, a shared query pushdown mechanism, RBAC-enforced access and audit logging.
- Healthcare Agentic Chatbot & Management Portal** | *AWS Bedrock AgentCore, FastAPI* Nov 2025 – Present
- Multi-agent chatbot (Product Recommendation, Health, Education) at >90% end-to-end accuracy, plus a portal for prompt/knowledge/guardrail management and real-time monitoring.
- Smart Product Recommendation System (SPR)** | *LLMs, AWS, Testing Automation* Oct – Nov 2025
- Automated LLM-based testing with enterprise rule validation and compliance checks, gating production releases on measured accuracy and latency.
- M3ARAG – Multi-Agent RAG System** | *LangChain, vLLM, Docling, PyTorch* | [Link](#) Aug – Oct 2025
- GPU-accelerated multi-agent RAG for local deployment, with an end-to-end document intelligence pipeline over PDFs, HTML, Office documents and text.
- Azure Blog System with Search & Recommendation** | *Azure AI Search, Cosmos DB, OpenAI* Aug – Oct 2025
- Full-stack blog platform with AI-powered semantic search and a personalized recommendation engine on Azure AI Search, Cosmos DB (NoSQL), Redis cache and Azure OpenAI.

Personal Projects (self-driven & academic)

- Fine-tuning Language Models for NLP Tasks** | *HF Transformers, PyTorch* | [Link](#) April 2025
- Fine-tuned and compared **T5-Base**, **BART-Base** and **Flan-T5-Small** across sentiment analysis, question answering and machine translation, weighing accuracy against efficiency and resource cost (5-member team).
- Sentiment Analysis with Various Models** | *Scikit-learn, Keras, PyTorch* | [Link](#) April 2025
- Benchmarked Decision Trees, Naïve Bayes, SVM, XGBoost, Random Forest, MLP and Bi-LSTM, focusing on feature transformation, high-dimensional data and hyperparameter tuning (5-member team).
- Detect AI-generated Text** | *Scikit-learn, Keras, PyTorch* | [Link](#) Dec 2024
- Compared classical models (SVM, Random Forest, XGBoost) against neural approaches (MLP, DistilBERT) to classify AI-generated text in the educational domain (3-member team).

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, C/C++, SQL, R
LLM & Agents: LangChain, AWS Strands, MCP, RAG Systems, Agent Evaluation/LLM-as-a-Judge, vLLM, Cohere Rerank, Pydantic
ML & Data: PyTorch, TensorFlow/Keras, Scikit-learn, XGBoost, Transformers/BERT, NumPy, Pandas, Polars
Cloud & DevOps: AWS – Bedrock AgentCore/KnowledgeBase, EC2, S3, ECS, ECR, Lambda; Azure – AI Search, Cosmos DB, OpenAI; Docker, Kubernetes, Terraform, CI/CD, OAuth 2.0/RBAC
Backend, Data Stores & Web: FastAPI, PostgreSQL, MySQL, MongoDB, Redis, Qdrant, ReactJS, Playwright/Selenium, Linux/Nginx

CERTIFICATIONS & TRAINING

Anthropic: Model Context Protocol: Advanced Topics (May 2026), AI Fluency Framework & Foundations (May 2026), Claude with Vertex AI (May 2026), Introduction to Subagents & Claude 101 (Apr 2026)
Google: AI Specialization & AI Fundamentals (Feb 2026), Prompting Essentials (Jun 2026), Foundations of Data Science (May 2026), Gemini Certified University Student (Dec 2025)
DeepLearning.AI: LangChain for LLM Apps, Functions & Tools with LangChain, AI Agents in LangGraph | **Hugging Face:** AI Agents Fundamentals (Jun 2025)
DataCamp: AI Engineer for Data Scientists Associate (Sep 2025) | **Google Cloud:** TensorFlow, Responsible AI for Developers, Generative AI with Gemini, Vertex AI skill badges
